

Upcoming Release

The SMS-Magic Converse 1.61 major release will be published soon.

It will include new updates for converse settings, consent record management, notifications and will incorporate new Do-It-Yourself changes in the upcoming version.

FEATURE	DESCRIPTION
Delete Consent Record	Admins will be able delete consent records if a customer requests for record deletion.
Double Opt-In from non-mobile devices	Users will be able to record double opt-in for specific content types.
Expire Consent Record	Users will be provided with an option to enable auto expiration of consent records.
Message Sending Limiting	Users will be able to set messaging frequency to avoid spamming.
Turn Off Compliance	Users will be allowed to use their own compliance modules by turning off compliance at SMS-Magic Converse Application.
Do It Yourself	Users will be able to setup converse application in minutes with our pre-configured sender ID, message objects (lead & contact) and send first test SMS features
Custom Plans	Customers can now avail lite licenses (Desk, Automation, View Only) on top of Start & Grow Plans and pay as you go as per feature requirements.

**Please note: The features are subject to change.*
