Version 1.53

Version 1.53

Improvements

N/A

Bug fixes

- Fixed issue for allowing non-admin users to use campaign manager by assigning a new permission set “Campaign Manager Permission Set”.
- Fixed issue for allowing message sending using Custom Reports having filter logic i.e Creating a report with filter logic using multiple objects (Standard and/or custom) for custom report types.
- Fixed issue for allowing message sending using List Views having filter logic applied.
- Fixed issue for allowing users to use org level created converse apps with campaign Manager.

Note: Non-admin user must be assigned with newly introduced “Campaign Manager Permission Set” in order to use Campaign Manager.
