

Quick Overview

1. **Header** settings (for example header background image) can be managed under *Appearance / Customize / Header*.
2. Upload your **Logo** under *Appearance / Customize / Site Identity*. Then head to *Appearance / Customize / Header* to limit its max width via *Logo Max Width* option.
3. **Site title and description** can be edited under *Settings / General*. You can hide them from header under *Appearance / Customize / Header* using the *Display Site Title* and *Display Site Tagline* options.
4. **Header Menu** can be managed under *Appearance / Menus*. Create a new menu and set its location to *Header Menu*. [Learn more about menus](#).
5. **Mega Menu** can be enabled by adding *lsvr-megamenu* class to the menu item's *CSS Classes* field (it will work only with first level menu items). If you do not see this field, enable it under *Screen Options* in upper right corner.
6. **Language Switcher** can be enabled under *Appearance / Customize / Languages*.
7. **Large Header Search** can be enabled under *Appearance / Customize / Header* by checking the *Enable Header Search* option and setting the *Large Header Search* option. You can change its settings with the various options below.
8. **Page Layout** can be set using the *Template* option in the right panel when editing a page. This applies only to standard pages though. Layout for post archive and detail pages can be set under *Appearance / Customize*.
9. **Page Title** is a standard title of a page. Page titles for post archives can be set under *Appearance / Customize*.
10. **Lore Sitemap** element can be added either via block editor or [via shortcode](#). Please note that similar design can be achieved also using the *Lore Knowledge Base* and *Lore Sidebar* elements. Please read the tutorial on [how to create the default front page](#).
11. **Lore Posts** element can be added either via block editor or [via shortcode](#).
12. **Footer Menu** can be managed under *Appearance / Menus*. Create a new menu and set its location to *Footer Menu*.
13. **Social Links** can be managed under *Appearance / Customize / Social Links*. You can enable or disable them under *Appearance / Customize / Footer* using the *Display Social Links* option.
14. **Footer Widgets** is a sidebar which you can edit under *Appearance / Widgets*. To change the number of its columns, go to *Appearance / Customize / Footer* and use *Widget Columns* option.
15. The **Text** widget can be added to the Footer Widgets sidebar under *Appearance / Widgets*.
16. The **LSVR FAQ** widget can be added to the Footer Widgets sidebar under *Appearance / Widgets*. This widget requires [LSVR FAQ](#) plugin.
17. The **LSVR KB Articles** widget can be added to the Footer Widgets sidebar under *Appearance / Widgets*. This widget requires [LSVR Knowledge Base](#)

plugin.

18. **Footer Text** can be edited under *Appearance / Customize / Footer*.
19. **Back To Top** button can be toggled under *Appearance / Customize / Footer* using the *Display Scroll To Top Button* option.
