

# Incoming SMS Alerts are Sent to Incorrect Recipient

## Issue Scenario

The incoming SMS alerts are sent to unintended recipient.

---

## Possible Causes

The following are the possible causes for the issue:

- Data indexing issue – There are more than 200,000 records on which the query runs. Therefore the incoming SMS is assigned to the OAuth user.
  - Notification settings are not configured correctly.
  - The Previous message lookup did not happen.
  - Incoming SMS was received from an unknown number.
  - User does not have permissions for updating the Previous Lookup or the related SMS History
- 

## Solution

Do the following to resolve the issue:

- Index all mobile fields. Refer to the document in the link provided below for more details on Field Indexing.  
[https://docs.google.com/document/d/1PsBNr8PQuKD\\_abbRwggCZTtfGQgedAdAU74tzqlZ10k/edit?usp=sharing](https://docs.google.com/document/d/1PsBNr8PQuKD_abbRwggCZTtfGQgedAdAU74tzqlZ10k/edit?usp=sharing)
- Configure all notifications correctly. For more details, refer the section on **Configure Incoming Notifications** under Sender ID and Assignment in the **SMS-Magic Converse Guide for Salesforce Admin**:
